

PRESS RELEASE

ADAMOS gains three new mechanical engineering partners

Bietigheim-Bissingen, July 17, 2019 – The ADAMOS software platform for the Industrial Internet of Things (IIoT) continues its growth trajectory in the mechanical engineering industry. In July, another three well-known industry players joined the digital partnership: Mayer & Cie. GmbH & Co. KG (Albstadt), world market leader in circular knitting machines; Schlenker Spannwerkzeuge GmbH (Villingen-Schwenningen); and Wittenstein SE (Igersheim), which specializes in mechatronic drive technology. As a result, the ADAMOS network now consists of 15 mechanical engineering firms plus Software AG.

ADAMOS is an open, manufacturer-neutral IIoT software platform, specifically tailored to the mechanical engineering sector and its customers. It offers simple digitization of production to users of machines and manufacturing facilities. The ADAMOS platform can be used to interconnect machines, enabling them to exchange information via the Internet. By means of data generated through ADAMOS, users are able to utilize digital services and thus increase their production efficiency. Examples include apps for predictive maintenance and for maximizing machine utilization.

Ralf W. Dieter, CEO of Dürr AG and Chairman of the ADAMOS Advisory Board, says: “ADAMOS is the mechanical engineering industry’s collective response to the challenges of digitization. At ADAMOS, we all learn and benefit from each other, because digital transformation is so complex that companies shouldn’t have to tackle it on their own.”

To allow interested mechanical engineering firms an easy way into platform economy, ADAMOS has now also added special Digital Transformation Services to

its portfolio. ADAMOS thus supports companies in implementing digital business models by offering training, consulting and implementation services. “ADAMOS is a service-oriented digitization partner for the mechanical engineering industry. Thanks to our cooperation model, members can save costs and speed up the development of apps for production optimization. In addition, we are together promoting the establishment of digital business models”, according to the two ADAMOS Managing Directors, Dr. Tim Busse and Dr. Marco Link.

ADAMOS was founded in 2017 by the mechanical engineering firms DMG MORI, Dürr, Zeiss and ASM PT, together with Software AG. The latter, enabling partner and Germany’s second largest software house, provides central software modules for the platform. The companies that are part of the ADAMOS network cooperate closely in developing apps and digital business models.

The Dürr Group is one of the world's leading mechanical and plant engineering firms with extensive expertise in automation and digitization/Industry 4.0. Its products, systems and services enable highly efficient manufacturing processes in different industries. The Dürr Group supplies sectors like the automotive industry, mechanical engineering, chemical, pharmaceutical and woodworking industries. It generated sales of € 3.87 billion in 2018. In October 2018, the Dürr Group acquired the industrial environmental technology business of US-based company Babcock & Wilcox, comprising the Megtec and Universal brands. Since then, it has over 16,400 employees and 108 business locations in 32 countries. The Group operates in the market with five divisions:

- **Paint and Final Assembly Systems:** *paint shops and final assembly systems for the automotive industry*
- **Application Technology:** *robot technologies for the automated application of paint, sealants and adhesives*
- **Clean Technology Systems:** *air pollution control, noise abatement systems and battery coating lines*

This publication has been prepared independently by Dürr AG/Dürr group (“Dürr”). It may contain statements which address such key issues as strategy, future financial results, events, competitive positions and product developments. Such forward-looking statements are subject to a number of risks, uncertainties and other factors, including, but not limited to those described in Dürr’s disclosures, in particular in the chapter “Risks” in Dürr’s annual report. Should one or more of these risks, uncertainties and other factors materialize, or should underlying expectations not occur or assumptions prove incorrect, actual results, performances or achievements of Dürr may vary materially from those described in the relevant forward-looking statements. These statements may be identified by words such as “expect,” “want,” “anticipate,” “intend,” “plan,” “believe,” “seek,” “estimate,” “will,” “project” or words of similar meaning. Dürr neither intends, nor assumes any obligation, to update or revise its forward-looking statements regularly in light of developments which differ from those anticipated. Stated competitive positions are based on management estimates supported by information provided by specialized external agencies.

Our financial reports, presentations, press releases and ad-hoc releases may include alternative financial metrics. These metrics are not defined in the IFRS (International Financial Reporting Standards). Dürr’s net assets, financial position and results of operations should not be assessed solely on the basis of these alternative financial metrics. Under no circumstances do they replace the performance indicators presented in the consolidated financial statements and calculated in accordance with the IFRS. The calculation of alternative financial metrics may vary from company to company despite the use of the same terminology. Further information regarding the alternative financial metrics used at Dürr can be found in our financial glossary on the Dürr web page (<https://www.durr-group.com/en/investor-relations/glossary/>).
